

National Oilwell Varco Norway AS is a wholly-owned subsidiary of National Oilwell Varco Inc., which has its head office in Houston, Texas. National Oilwell Varco is a global leader within the sale, design, manufacture and implementation of systems and products for the oil and gas industry. National Oilwell Varco is an internationally recognised supplier of innovative high-technology solutions, and has more than 64,200 employees spread over 61 countries. National Oilwell Varco Norway AS currently has 4,750 employees in Norway, and its head office is located in Kristiansand. The company also has regional offices in Stavanger, Molde, Asker and Arendal, as well as local offices in Tønsberg and Trondheim. www.nov.com

National Oilwell Varco Inc. is a global, expanding and innovative company. We established an Engineering office in Lisbon and are therefore seeking to appoint talented engineers. NOV Portugal, which is a subsidiary of National Oilwell Varco Norway shall have 100-120 skilled engineers by the beginning of 2015. The workplace will be at our office in Lisbon, working with our divisions in Norway.

Mechanical Design Engineer

We wish to reinforce several of our mechanical groups on the design side and are therefore seeking qualified and talented Mechanical Design Engineers for our new office in Lisbon. We are looking for those who can work independently, whilst at the same time maintaining close contact with product and mechanical engineering managers. First and foremost we are looking for experienced Mechanical Design Engineers; however, newly-qualified candidates are also welcome to apply.

Work assignments:

- Detail design in Autodesk Inventor, in accordance with NOV's guidelines;
- Drafting of complete project-specific drawing packages for production;
- Technical clarifications with workshops/sub-contractors/sites.

Qualifications and skills:

- Engineering education (Master);
- Experience with mechanical design will be an advantage;
- Experience of using 3D design tools such as Autodesk Inventor or AUTOCAD will be an advantage;
- Good communication skills, structured approach, be flexible and quality-conscious;
- Good written and verbal presentation abilities in Portuguese and English are required;
- Personal skills/profile will be emphasized.

We want to join forces with positive, motivated employees who are able to work independently but also together in a team. You will become part of a competent, creative and informal professional group that requires personal qualities such as independence, the ability to take initiative and to cooperate across professional disciplines and divisions.

We offer:

At National Oilwell Varco we offer interesting and challenging assignments in an international environment. The company enjoys an informal working atmosphere, characterized by openness, teamwork and personal responsibility. Within NOV there are excellent opportunities for professional development and we offer competitive terms and conditions. For more information about National Oilwell Varco Inc, see: www.nov.com. There will be in some cases an initial training period in Norway for up to 3 months. We will evaluate permanent employment with NOV Portugal after 6 months engagement.

How to apply?

NOV is cooperating with Kelly Services Portugal to staff the new Lisbon office. Please send your CV with transcriptions to: sonia.pinto@kellyservices.pt
