

Connecting Software is looking for an experienced and enthusiastic **Software Developer** to work closely with our team. This is a great opportunity to work with a winning company developing world class solutions with cutting edge technologies.

We are looking for outstanding professionals, hunger to always try something new, and search for the best solutions to challenging problems. Are you ready?

In your new position, you will be a part of our agile software development team and responsible for the design and implementation of innovation back-end applications for the tourism industry, which set standards for performance and reliability. You work with the latest technologies and bring your own ideas to the table.

Your tasks include:

- Conception and development of database (MongoDB/Solr) and Applications in Java/Kotlin;
- Use of Java Enterprise Methods with REST - web services, Messaging (JMS) and reactive Frameworks (LMAX Disruptor);
- XML-/JSON-/CSV data processing, that meet the highest standards of reliability and performance;
- Care and further development of existing software components;
- Testing and TDD are a natural addition to your responsibilities.

#### WHAT ARE YOU BRINGING

With your quick wit, strong commitment, curiosity and ability to quickly become familiar with new and complex situations, you have a very good foundation for success in our development team. Your excellent communication skills, combined with a very structured and analytical way of thinking round out your profile.

- Apprenticeship in mathematical-technical Software Development or as an IT Specialist in Application Development or a degree in Information Technology;
- Knowledge of Java and preferably another object-oriented programming language;
- Experience with web services and processing of XML documents;
- Good knowledge of NoSQL (preferably MongoDB) and/or relational databases;
- Clear understanding of Software-Engineering-Principles, Best-Practice-Methods and Design-Patterns;
- Good English language skills.

The following skills would be advantageous:

- Understanding of the tourism industry;
- Experience dealing with agile methods (e.g. SCRUM or KANBAN) ;
- Knowledge of reactive Frameworks (Reactor, RxJava or something else) ;
- Tomcat, ActiveMQ, JAXB, JMS, REST, CDI, Jersey and Junit are not foreign to you;
- Microservices and Docker are more than Buzzwords for you;
- Knowledge of another scripting language (Bash, Python, etc.) and Unix;
- Experience working with Maven, GIT, Docker, Kafka, Bamboo, Jira, Confluence.

Apply with your CV in Europass model, via CV to [ricardo@connecting-software.com](mailto:ricardo@connecting-software.com).
