

MASTER OF PHYSICS - FIRST YEAR DISTANCE-LEARNING «M1-MPAD» FUNDAMENTAL PHYSICS

PRESENTATION

The M1 -MPAD is a new degree course, based on **distance learning**. The corresponding 4th year University diploma («Maîtrise»), delivered by Aix-Marseille University (AMU), allows to postulate for any «Master 2» (Master 2nd year in Physics, Specialities research, professional or teaching) in France or abroad.

The eventual creation of a complete Master course in Physics (M1 and M2) using «distance learning», leading to a recognized university degree at the «5th year university level» is considered for September 2018.

Delivered by Aix-Marseille University, provided by the teachers attached to internationally competitive research laboratories, taught courses offer **advanced training in fundamental and applied Physics**.

OBJECTIVES

At the -expected- Master level (M1 +M2) the purpose of this training, focused on «Fundamental Physics», will be to allow every MPAD graduate student:

- To gain a strong general education in the major areas of physics and hence, for example:
- To access to very high-level specialized training, integrating advanced technological developments mandatory for new jobs.
- To be competent actors and trainers in educational structures or research and development domains, public or private, interdisciplinary or not.
- To justify a second area of expertise, often considered as necessary by potential employers.

MASTER OF PHYSICS - «M1-MPAD»

TEACHING PROGRAMS

- The M1 program was designed to allow easy access to different specialized Masters of Physics (or connected domains), including the cursus «french teaching contest».
- The M2-MPAD program (expected beginning in September 2018) should focus on four major, rapidly changing, fields of physics.

To view the programs of M1- MPAD use the link:

French and English versions available on this site.

APPLICATIONS

Any candidate must justify of a level of training in Physics (Domain: Science and Technology) covering at least 3 academic years (Bachelor or equivalent).

SUBSCRIPTIONS

Subscriptions are performed by the Remote Teaching Center Faculty of Science (CTES) - Aix-Marseille University. All informations are available at :
www.sciences.univ-amu.fr/CTES

CONTACTS

Directors

José BUSTO : Département de Physique, UFR Sciences, AMU.
Céline MARTIN : Département de Physique et CTES, AMU.
